1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.

1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.

1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.

1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.

1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions

Commodity descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a commodity classification or country name from this report indicates no transactions for that commodity or country.

FT 110

Effective with the July 1946 issue of this report country detail within each commodity is limited to those countries from which the value of imports for the month was $500 or over. Transactions for all countries from which import values were less than $500 are grouped within each commodity and shown as "Oth Cty" (Other Countries). Also for commodities having quantities reported in two units, transactions for the second unit are shown as a total for each commodity.

Commodity descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a commodity classification or country name from this report indicates no transactions for that commodity or country.

FT 110

Effective with the July 1946 issue of this report country detail within each commodity is limited to those countries from which the value of imports for the month was $500 or over. Transactions for all countries from which import values were less than $500 are grouped within each commodity and shown as "Oth Cty" (Other Countries). Also for commodities having quantities reported in two units, transactions for the second unit are shown as a total for each commodity.

Commodity descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published) as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a commodity classification or country name from this report indicates no transactions for that commodity or country.

FT 110

Effective with the July 1946 issue of this report country detail within each commodity is limited to those countries from which the value of imports for the month was $500 or over. Transactions for all countries from which import values were less than $500 are grouped within each commodity and shown as "Oth Cty" (Other Countries). Also for commodities having quantities reported in two units, transactions for the second unit are shown as a total for each commodity.

1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.

1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.

Commodity descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a commodity classification or country name from this report indicates no transactions for that commodity or country.

General imports, commodity by country of origin arrangement, is issued in three sections (Groups 00, 0, 1 and 2 combined, and 6, 7, 8 and 9 combined).

General imports, country of origin by commodity arrangement, is issued in three sections (A, B, and C).

Effective with the July 1946 issue of this report country detail within each commodity is limited to those countries from which the value of imports for the month was $500 or over. Transactions for all countries from which import values were less than $500 are grouped within each commodity and shown as "0th Cty" (Other Countries). In the case of commodities reported in two units of quantity, transactions from all countries are grouped for the second quantity.

Note.—NT - No Transactions.

Commodity descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a commodity classification or country name from this report indicates no transactions for that commodity or country.

General imports, commodity by country of origin arrangement, is issued in three sections (Groups 00, 0, 1 and 2 combined, and 6, 7, 8 and 9 combined).

General imports, country of origin by commodity arrangement, is issued in three sections- (A, B, and C).

Effective with the July 1946 issue of this report country detail within each commodity is limited to those countries from which the value of imports for the month was $500 or over. Transactions for all countries from which import values were less than $500 are grouped within each commodity and shown as "Oth Cty" (Other Countries). In the case of commodities reported in two units of quantity, transactions from all countries are grouped for the second quantity.

Note.—NT - No Transactions.

Commodity descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a commodity classification or country name from this report indicates no transactions for that commodity or country.

General imports, commodity by country of origin arrangement, is issued in three sections (Groups 00, 0, 1 and 2 combined, and 6, 7, 8 and 9 combined).

General imports, country of origin by commodity arrangement, is issued in three sections (A, B, and C).

Effective with the July 1946 issue of this report country detail within each commodity is limited to those countries from which the value of imports for the month was $500 or over. Transactions for all countries from which import values were less than $500 are grouped within each commodity and shown as "Oth Cty" (Other Countries). In the case of commodities reported in two units of quantity, transactions from all countries are grouped for the second quantity.

Note.—NT - No Transactions.

1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.

Commodity descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a commodity classification or country name from this report indicates no transactions.

Effective with the July 1946 issue of this report country detail within each commodity is limited to those countries from which the value of imports for the month was $500 or over. Transactions for all countries from which import values were less than $500 are grouped within each commodity and shown as "0th Cty" (Other Countries).
